ADVANCED FIBER SOLUTIONS

The FCT100 is a bright visible light source for checking continuity or quickly tracing multimode fibers in networks to insure proper connections, a difficult task in large fiber count systems. In addition, it can be used as a continuity checker to determine if jumper cables with connections or fiber on reels are in good condition or if installed fiber has been damaged. With a range of 4 km (2.5 mi.), it is perfect for testing and troubleshooting every multimode fiber network. And it's so

inexpensive, every installer in the crew can afford one!

Model	Fiber	Range	Power	Connectors
